Sr. Software Engineer

Sr. Game Developer (Unity, C#)

BSc. Computer Science

Sr. Unity engineer with 7+ years of experience shipping 15+ commercial mobile games with international studios. Hands-on ownership across architecture, gameplay & systems, tooling, back-end, live-ops & legacy code-bases.

Managers Feedback ★

"Meticulous engineer with strong work ethics, someone who will always get the job done."

— Adrian V., Tech. Director at Games & Leaves, Ex-GameLoft, Ex-Bandai-Namco, 18+ Yrs Exp.

"Extremely detail-oriented, delivers high quality & maintainable code, a highly valuable asset."

— Brian B., SVP Engineering at Pink Moon Studios (Kryptomon), Ex-Oracle, 20+ Yrs Exp.

Professional Experience

Sr. Software Engineer – Game Development (Unity, C#) / Games & Leaves (Jul 2025 - Mar 2026)

- Generalist engineer on economy, live-ops & back-end heavy **Goalden League** game (100K+ installs)
- Delivered complex, pure skill-based penalty shootout **gameplay** module; **boosted +9% retention**
- Held **full-breadth ownership** across **gameplay** programming, **back-end** and game **economy** domains
- Earned **technical director's trust** early, **owning critical systems** and modules independently

Sr. Software Engineer – Game Dev. (Unity, C#) / Pink Moon Studios (Kmon) (Mar 2023 - Mar 2025)

- Delivered on 2 back-end heavy projects: **turn-based battle RPG** & **open-world MMORPG** (mobile/PC)
- Worked on complex **Zenject**-based **legacy code-base** & new in-house **Mythos engine** on top of Unity
- Overhauled **legacy** code base, developed new **modules** and led **technical hiring** across 2 projects
- Heavily **optimized** a boss battle to support **50+ concurrent online players** across mobile and PC.

Sr. Software Engineer – Game Dev. (Unity, C#) / Arcadian Labs (Jul 2022 - Dec 2022)

- Led & delivered** a scoped **racing companion app**, like **NFS-Studio**, a precursor to a **full PC racing game**
- Prototype was used in **investor pitches** targeting **~\$2M funding** in the Web3/NFT domain

Technical Lead – Game Dev. (Unity, C#) / Arcadian Labs (Nov 2021 - Jun 2022)

- Rapid-prototyped **hyper-casual** games at a **Unity-recognized studio**, leading a team of **10 engineers**
- Delivered **top-chart** hits like this **Flight Sim (10M+ installs)** for top publishers like Zynga, Supersonic

Sr. Software Engineer – Game Dev. (Unity, C#) / Terafort (May 2021 - Nov 2021)

- Team Lead/Lead Programmer** on Homescape-style **casual mobile game**, shipped to **500K+ downloads**
- Product ownership**, game **architecture**, progression **systems**, level design, **gameplay** programming

Software Engineer – Game Dev. (Unity, C#) / Freelance (Aug 2018 - Dec 2020)

- Solo-developed mid-sized mobile games, owning end-to-end **architecture**, **gameplay**, and **systems**
- Built **GTA-V-style plane stunts**, **PUBG-style shooting sandbox**, **knockout racing** with 3rd-party assets
- Pivoted to hands-on game engineering, **self-learning** and migrating from **Cocos2d (C++)** to **Unity (C#)**

Founding Software Engineer – Game Dev. (Cocos2d, C++) / Blackbit Games (Apr 2016 - Jun 2018)

- Founded and ran a small studio; **sole architect** and **builder** of a **custom Cocos2d-x game framework**, hiring & mentoring a **3-engineer team** to deliver **iOS/Android games** for international clients

Software Engineer – Android Platform Support (Cocos2d, C++) / Gaminations (Jul 2014 - Dec 2015)

- Contributed to Android port of Century Games' flagship title **Family Farm Seaside** (50M+ downloads)

Skill Points ★

Game Architectures: Singleton-Managers, DI/Zenject
Stack: Unity, C#, C++, Azure, Firebase, MongoDB, Git, Jira
SOLID, DOTS, Addressables, Profiling, Live Ops, Refactoring
Prototyping, **Gameplay**, Back-end, **AI-Assisted Coding**
Proven **Remote Ethics**, Excellent **English & Communication**

Achievements ★

- 15+ commercial mobile game projects** (across all genres)
- 2 AA international game studios experience**
- Endorsed** by 2 AA game studios **Engineering Managers ★**
- Founding Engineer**, authored **game framework (C++)**,
- Led 4 cross-functional teams**; **value for employers** mindset
